

# How to use Shorts in content?

## 1. Overview

The Shorts feature is a video-focused module type within the Content section that allows admins to create and publish short-form video content. It provides a simplified structure with a single section, a single page, and one video per page to support a clean Shorts experience across desktop and mobile devices.

## 2. When to Use

- When you want to share short-form video learning content within a module.
- When you need a simplified content structure focused only on video playback.
- When you want learners to consume quick video-based learning content in a carousel or vertical swipe format.
- When creating mobile-friendly learning experiences similar to YouTube Shorts or Instagram Reels.

## 3. Concepts

- **Shorts Module Type** - A dedicated module type for short-form video content.
- **Single Content Structure** - Allows only one section, one page, and one video content item.
- **Video Upload Interface** - Supports uploading videos in multiple formats.
- **Carousel View** - Displays Shorts content in horizontal card format.

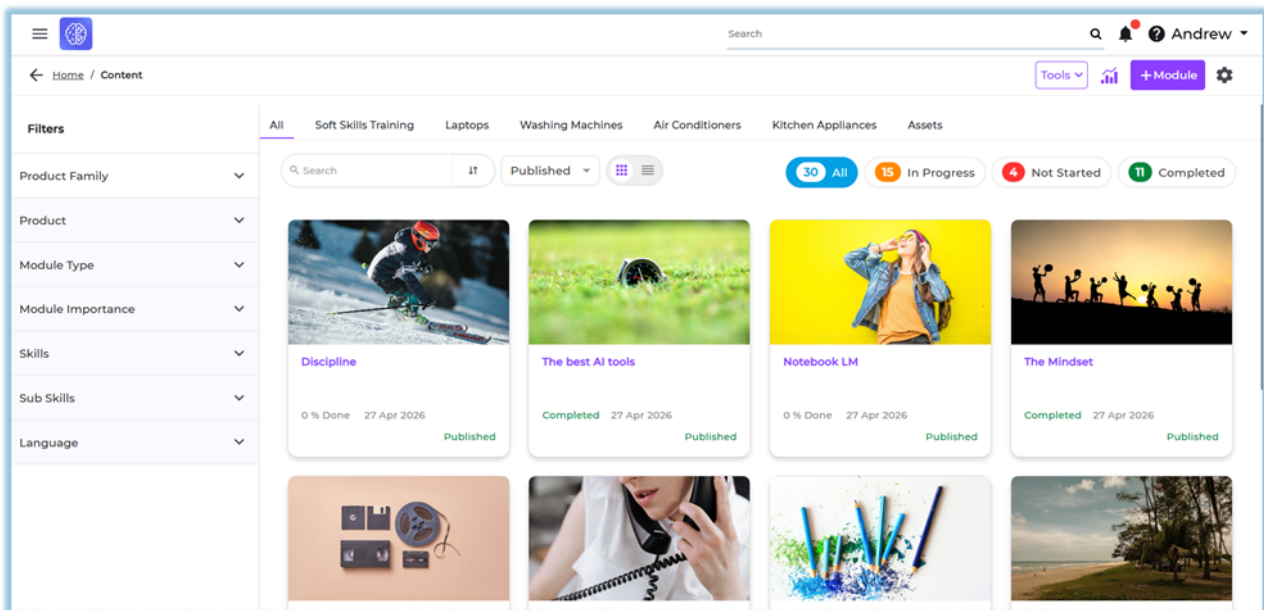

- **Play Shorts Page** – Opens Shorts videos in a focused playback view.
- **Vertical Swipe Experience** – Allows users to swipe through Shorts videos on mobile and desktop.
- **Seen Status** – Tracks whether the learner has completed watching the video.
- **Content Views** – Displays total view count using the eye icon.

## 4. Set Up Guide

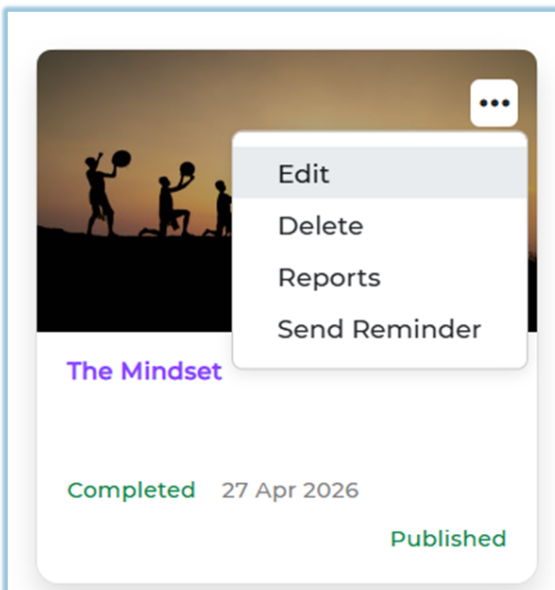

### Step 1: Create a Shorts Module

1. Navigate to the **Module** page.

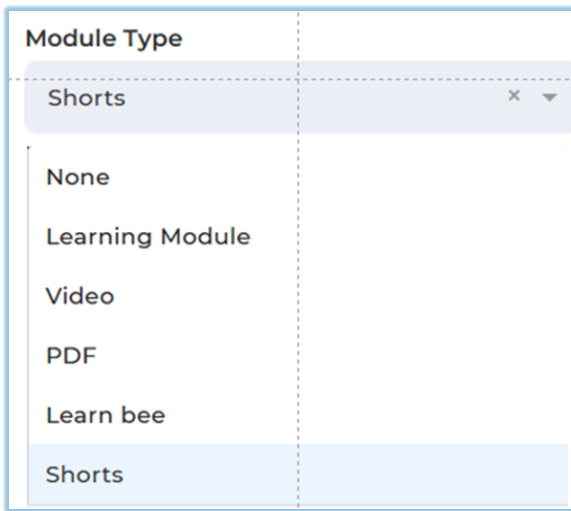

<https://converse.bsharpcorp.com/content>

2. Create a new module or open an existing module.

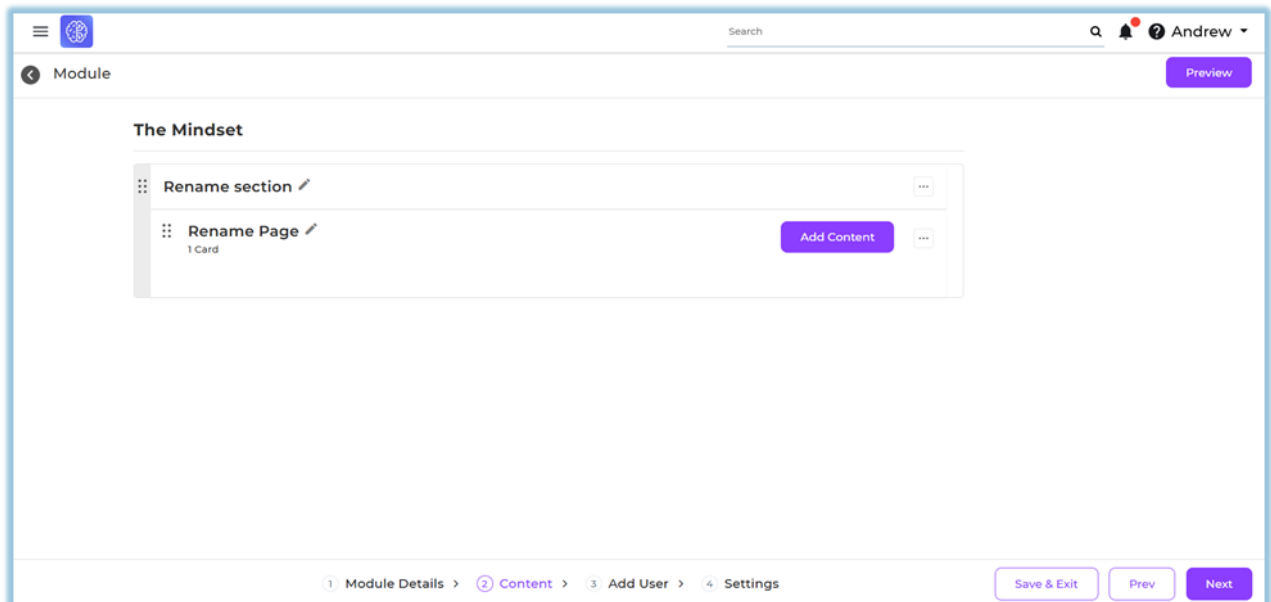

3. Select the module type as **Shorts**.

## Step 2: Configure Module Structure

4. Review the default section and single page created automatically.
5. Edit the **Section Title** if required.
6. Edit the **Page Name** if required.

## Step 3: Add Shorts Content

7. Open the page inside the Shorts module.
8. Use the video upload interface displayed on the page.
9. Upload a video file.
10. Upload videos in supported formats such as:
  - MP4
  - MOV
  - WebM

< Add Shorts

TITLE

Mindset

**Language versions**  
Add one video file per language. Mark one as default. All entries are saved when you click Save.

Upload · Click to replace

+ Add language version

**Allow download**   
Learners can save this video for offline viewing

**Minimum viewing time**   
Require learners to watch for at least this duration

11. Wait for the upload process to complete.

## Step 4: Configure Module Access

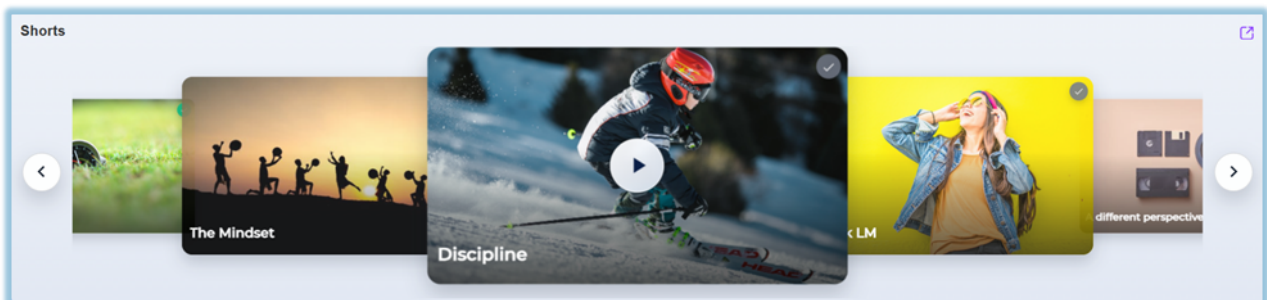

12. Add users to the module.
13. Configure the required module settings.

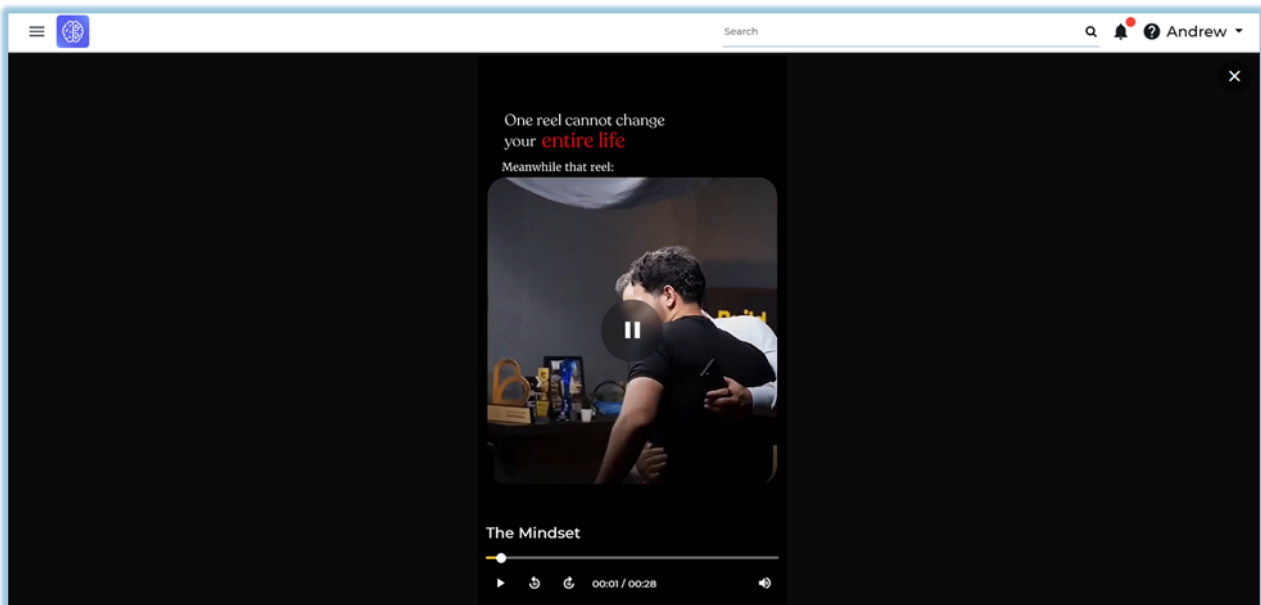

## Step 5: Publish the Shorts Module

14. Review the uploaded Shorts content.
15. Click **Publish** to publish the Shorts module.

# 5. User View

- Shorts content appears in a carousel format with video thumbnails and titles.

- Desktop users can scroll through Shorts using:
  - Mouse scroll
  - Arrow controls
  - Touchpad gestures
- Mobile users can swipe horizontally through Shorts cards.
- Clicking a Shorts card opens the **play-shorts** page directly without showing the standard landing page.
- Videos are displayed in a vertical swipe format similar to YouTube Shorts or Instagram Reels.
- Desktop users see video controls on hover.
- Mobile users always see video controls.
- Videos automatically start preview playback when users hover over the active card on desktop.
- If no Shorts videos are available, the message **“No Shorts Available”** is displayed.
- Videos that do not match the container aspect ratio are displayed with black background spacing to maintain original dimensions without distortion.
- Videos are marked as **Seen** after users complete watching them.

## 6. Reporting

- **Content Views** displays the total number of views across the organization using the eye icon.
- Shorts completion data is stored after users complete watching the video.
- View tracking is recorded when the Shorts video becomes visible on the user’s screen.

## 7. Best Practices

- Upload videos in supported formats for better compatibility.
- Use clear titles for easier identification in the carousel view.

- Review video aspect ratios before upload to improve viewing consistency.
- Keep Shorts videos concise and focused on a single learning topic.

## 8. Related Links / FAQs

**Q: How many content items can be added inside a Shorts page?**

A: Only one video content item is allowed per page.

**Q: Can additional sections or pages be added to a Shorts module?**

A: No. Add New Section and Add New Page options are removed.

**Q: What happens when users click a Shorts card?**

A: The content opens directly in the play-shorts page without showing the standard landing page.

**Q: What happens if no Shorts videos are available?**

A: The message “No Shorts Available” is displayed.
